## 1. Merapikan atau mengganti codingan di file sidebar.blade.php

The image displays two screenshots of the Visual Studio Code editor, showing the process of editing the `sidebar.blade.php` file for a project named `TA-ADADEH`.

**Top Screenshot:** The Explorer panel on the left shows the file structure. The `views` folder is expanded, and `includes` is selected. The `sidebar.blade.php` file is open in the editor. The code shows a sidebar structure with a brand section, a divider, and a list of navigation items. The first item is 'Dashboard' with a tachometer icon. The second item is 'Beranda' with a hotel icon. The third item is 'Jenis Buku' with a book icon. The fourth item is 'Nomor Buku' with a book icon.

**Bottom Screenshot:** The same file is open, but the code has been modified. The 'Beranda' item has been replaced with 'Jenis Buku' and 'Nomor Buku'. A new item 'Transaksi' has been added with a dollar sign icon. A new 'Sidebar Toggle' button has been added at the bottom of the sidebar. The code is as follows:

```
1 <!-- Sidebar -->
2 <ul class="navbar-nav bg-gradient-primary sidebar sidebar-dark accordion" id="accordionSidebar">
3
4 <!-- Sidebar - Brand -->
5 <a class="sidebar-brand d-flex align-items-center justify-content-center" href="index.html">
6 | <div class="sidebar-brand-text mx-3">
